CSCR300: Web Development

This course, built in collaboration with Google covers everything you need to know in order to build a website from scratch. You'll learn HTML, CSS and Javascript - the core technologies which power modern websites - and build a website of your own. By the end of this course you'll be able to create interactive, aesthetically pleasing websites for any purpose you can imagine.

Credit Hour(s): 3
Prerequisites:
CSC115
