

## CHE318: Forensic Chemistry Lab

This laboratory course is designed to complement CHE317 Forensic Chemistry. Experiments include soil, hair, and fiber analysis; matching glass and plastic samples; fingerprinting; drug and toxicology tests; analysis of gunshot and explosives residues; detecting forgeries and fakes; impressions such as tools and footprints; and instrumental analysis. CHE317 is optional.

**Credit Hour(s):** 1

**Prerequisites:**

CHE112
