

ENV433: Environmental Science and Natural Resources

A study of the principles of environmental science and their application to current issues. Emphasis is placed on the use of natural resources (energy, mineral, water, and biological) and the consequences of that use (resource depletion, water and air pollution, hazardous and non-hazardous waste).

Credit Hour(s): 3

Prerequisites:

BIO402

Co-Requisites:

BIO314

Note: This course may also be taken as a prerequisite.

Program: Biological Sciences

Semester Offered:

Spring (odd)
