

ITMR300: Operating Systems and Architecture

Whether you're using a Mac or a PC, operating systems are a key part of how humans interface with technology. Therefore, understanding how they work is vital to understanding how computers power our world. This course will teach you the fundamentals of Operating System structure, function, and architecture, and prepare you to administer both Windows and Linux-based systems.

Credit Hour(s): 3

Prerequisites:

CSC215

ITMR100

Department: [Mathematics, Physics, and Computer Science](#)
