

Computer Science Minor (CSC)

Computing pervades both the economy and contemporary society; a minor in computer science can improve your job prospects and enhance your capacity to contribute to the common good. Providing a background in programming fundamentals, web design and development, databases and data analysis, the minor is a valuable complement to a wide variety of majors in the social and natural sciences and in the humanities.

Program Contact: PROFESSOR WILLIAM HARRIS

Department: Computer Science

Type: Minor

Core Courses 15 hours

Total 15

Core Courses

Note: With permission of the Program Coordinator, CSC470 may be substituted for one of these courses

Item #	Title	Credit Hour(s)
CSC115	Computer Science I	3
CSC215	Computer Science II	3
CSC303	Fundamentals of Data Computing	3
CSC324	Web Programming	3
ITMR320	PostgreSQL	3
Total credits:		15
